www.inclusivegrowth.eu
The aim to build a dataset: context

- Limited data at European level regarding working conditions
- Useful national data collection

→ harmonizing = win-win?
The aim to build a dataset: plan

- Select countries to start with: Germany, The Netherlands, (Sweden, Norway, France)

- Select job quality indicators

<table>
<thead>
<tr>
<th>Work</th>
<th>Employment</th>
<th>Social relations</th>

</tbody>
</table>
The aim to build a dataset: plan

• Construct indicators based on national data
• Compare with EWCS results for check

• Later: add countries, add job quality outcomes, add time series, disseminate via IPUMS

• End objective: provide harmonized dataset showing trends in job quality indicators based on national data
